AI와 K-컬처, 콘텐츠, 디자인, 예술이 만나는 곳, 미래 콘텐츠 크리에이터의 요람

Department Introduction

The Department of AI Creation (AI창작학과) trains next-generation creators who use AI to work across characters, illustration, animation/film, video, design, advertising and promotion, novels, music, and sound, combining technical skill with artistic sensibility.

Department Description

The curriculum combines AI with the strengths of K-Culture/K-Content — K-Drama, K-Pop, webtoons, animation/film — to connect Korea's cultural originality with the global market, through project-based practice and industry-academia collaboration. AI programming and Python courses are deliberately excluded; the program focuses entirely on how to use AI to create, not how to build it.

What makes Sejong Cyber University's AI Creation (New) different?

01 **Special focus on AI-based creation in content**

design, and art: illustration, video, music, animation, film, design, advertising — not AI programming.

02 **Trains K-Culture/K-Content experts**

AI is used to design K-Pop, K-animation/film, and webtoons for the global market.

03 **No AI programming or Python courses**

everything is taught through hands-on demonstrations so anyone can easily follow along.

04 **Step-by-step curriculum from basic drawing/design to advanced AI application per field (character, animation, video, design).**

05 **Can earn more than one completion certificate at once**

AI Illustration/Character, AI Video/Film-Animation, AI Advertising-Design-Marketing, AI Music/Video Production.

06 **Team-based AI practice projects**

including vibe coding to build creative apps/games, are showcased through exhibitions and competitions.
