'공예(工藝)'는 '공(工/Technology)'과 '예(藝/Art)'가 함께 하는 예술적 감각과 시대 문화 현상을 생활공간에 표현하는 융복합 학문입니다.

Department Introduction

Craft (gong-ye) is a fusion discipline of technology and art: the human act of expressing artistic sensibility and the cultural phenomena of an era within everyday living spaces. Built on systematic theory and practice, the department trains talent who create a creative and productive craft culture.

Department Description

Here you can sharpen your creative abilities in ceramic craft close to everyday life, metal craft for making jewelry and household items, and fiber craft based on the character of fiber materials and textile design. Its educational goal: to cultivate each student's craftsmanship spirit in craft culture along with their active, creative will, through courses spanning artistic-academic theory, fundamentals, advanced study, and cross-genre fusion that responds to today's paradigms.
