Department Introduction

This department prepares future professionals in outdoor-environment planning, design, construction, ecological restoration, and management — from home gardens and city parks to city-wide and national scales.

Department Description

The program delivers strong theoretical and practical education, from foundational to core to applied levels, in landscape architecture, ecological restoration, and turf/plant management. Its goal is to train outstanding experts in landscape planning, design, and construction, ecological restoration, and turf/plant management for urban and national outdoor environments.
